Experience

Startup Company (Airbnb-style Platform)

2026 – Present

Frontend Engineer – React.js

Remote

- Architected and scaled a complex Airbnb-style property rental platform using React.js, implementing dynamic UI flows, real-time search/filtering, and robust booking systems.
- Seamlessly integrated APIs and collaborated cross-functionally with product and design teams in agile sprints.

Startup Company

2025

Full-Stack Developer – React & React Native (Expo)

Remote

- Engineered cross-platform web and mobile applications using React.js/React Native (Expo), developing reusable component libraries and integrating RESTful APIs.
- Executed secure authentication flows and delivered production-ready features rapidly in a dynamic startup environment.

GirlScript Summer of Code (GSSoC 2024)

Jun 2024 – Oct 2024

Open-Source Contributor – Ranked #344 Globally

Remote

- Actively contributed to GSSoC 2024, achieving a global ranking of #344 among thousands of contributors.
- Drove improvements across multiple open-source repositories and shipped enhancements to production codebases collaborating with international teams.

Hacktoberfest

Oct 2024

Open-Source Contributor – Level 1–4 Badges

Remote

- Actively participated in Hacktoberfest, achieving all Level 1–4 badges, and contributed to SWOC/GSSoC-ext, fostering engagement within the global open-source community.

Skills

Frontend: React.js, React Native, Next.js, TypeScript, JavaScript (ES6+), Redux, HTML5, CSS3, Tailwind CSS, Bootstrap, ShadCN, Framer Motion

Backend: Node.js, Express.js, REST API, GraphQL

Database: MongoDB, Mongoose, PostgreSQL, MySQL, Prisma

Auth & Tools: Firebase, NextAuth, JWT, Docker, Git, GitHub, CI/CD, Puppeteer

Testing: Jest, React Testing Library, Vitest

Projects

InterviewAI – AI-Powered Interview Preparation Platform | Live | Frontend | Backend | API Docs

- Engineered an AI-driven platform that streamlines interview preparation by analyzing resumes against job descriptions with Google Gemini AI, delivering personalized strategies in under 30 seconds.
- Provided users with a comprehensive suite of tools, including an AI Match Score (0-100), tailored technical/behavioral questions with STAR-method guidance, skill gap analysis, a 7-day preparation roadmap, and a mock interview simulator.
- Ensured robust security through httpOnly cookie-based JWT authentication and rate limiting; meticulously documented the API with OpenAPI 3.0 Swagger UI for seamless integration.

DevHunt – Full-Stack Job Hunt Platform | Live | Frontend | Backend | API Docs

- Developed a full-featured, production-grade job portal, connecting students with opportunities and empowering recruiters to efficiently post listings, manage applications, and make informed hiring decisions.
- Secured the platform with email OTP verification and role-based access (Student/Recruiter) using JWT authentication in HTTP-only cookies; integrated full-text job search and streamlined one-click applications.
- Enhanced user experience by integrating AI-powered job recommendations via Google Gemma (OpenRouter API) with a robust fallback algorithm; documented 21 API endpoints using Swagger for developer clarity.

Ride Share – Full-Stack Ride-Hailing Platform | Live | Frontend | Backend

- Designed and developed a production-ready Uber-like ride-sharing application, featuring dual JWT authentication and real-time ride lifecycle event updates via Socket.IO, eliminating polling.
- Incorporated live GPS tracking and a dynamic fare engine for various vehicle types (Auto, Car, Motorcycle), accurately calculating fares based on real driving distance/duration via Geoapify Routing API.
- Enhanced safety and efficiency with OTP-based ride verification and intelligent captain discovery utilizing MongoDB geospatial queries; meticulously documented 16 API endpoints and 9 Socket.IO events.

Shopping Mall – Full-Stack E-Commerce Platform | Live | Frontend | Backend | API Docs

- Architected and deployed a production-ready e-commerce platform, complete with a dynamic 4-floor mall directory, advanced product filtering capabilities, and a seamless slide-in cart with Stripe-hosted checkout.
- Developed comprehensive customer dashboards and an intuitive admin CMS featuring robust analytics (KPI cards, Chart.js visualizations); optimized performance and reduced redundant API calls using RTK Query.
- Secured the platform with JWT authentication and bcrypt hashing, while meticulously documenting 28 API endpoints with Swagger to support over 1,000 concurrent users with high reliability.

Education

National University

2020 – 2024

Bachelor of Arts, Political Science

Dhaka

- Earned Bachelor's degree concurrently with independently mastering full-stack web development and delivering production-grade applications.
